Item 1. Business

Armada Freight Services is a privately held, asset-light carrier and third-party logistics provider focused on regional dry van truckload, dedicated contract carriage and LTL consolidation in the Southeast and South Central United States.

Armada operates 1,150 company tractors and 3,400 dry van trailers, and supplements its own fleet with a vetted network of about 2,800 partner carriers for overflow and surge capacity.

The Dallas to Atlanta corridor is Armada's highest-density lane, and the company runs a drop-trailer pool of 260 trailers at shipper facilities on that corridor.

Armada offers three service lines: regional truckload, dedicated fleets for retail and consumer packaged goods shippers, and an LTL consolidation program that builds multi-stop truckloads from LTL freight.

Armada's customer base is concentrated: its ten largest shippers generated 58% of revenue in 2025, and its largest shipper generated 14% of revenue.

Armada commits to a tender acceptance target of 92% on contracted lanes and publishes a weekly scorecard to each contract shipper.

The company employs about 1,600 people, including 1,240 professional drivers. Driver turnover was 64% in 2025, below the large truckload industry average reported by trade groups.

Armada's transportation management system provides electronic tendering through EDI and API connections, real-time tracking from electronic logging devices on every company tractor, and automated appointment scheduling.

SYNTHETIC PROFILE. Not an SEC filing. Illustrative data for the LaneRoom demo.

Item 1A. Risk Factors

Armada's capacity during peak season is limited by its fleet size. In the fourth quarter of 2025 Armada relied on partner carriers for 31% of its loads, compared with 18% in the first three quarters, and its tender acceptance fell on surge volume.

Armada is privately held and its financial statements are not audited by a registered public accounting firm or filed with the SEC, so shippers cannot verify its financial condition from public filings.

Armada has a revolving credit facility of $60 million, of which $41 million was drawn at year-end 2025, which may limit its ability to add tractors if freight demand rises quickly.

Customer concentration is a risk: the loss of one of its ten largest shippers could reduce revenue and network density on its core lanes.

A shortage of qualified drivers could increase driver pay and recruiting costs and reduce the number of tractors Armada can keep seated.

Armada's insurance program uses a self-insured retention of $1 million per occurrence for auto liability, so a large accident claim could materially affect its results.

Fuel price volatility is passed through to shippers with a fuel surcharge schedule, but surcharges lag fuel price changes by about one week.

SYNTHETIC PROFILE. Not an SEC filing. Illustrative data for the LaneRoom demo.

Item 2. Properties

Armada operates 9 terminals and 4 drop yards. Its headquarters and largest terminal are in Dallas, Texas, and its second largest terminal is in Atlanta, Georgia.

Location	Type	Doors
Dallas, TX	Terminal and headquarters	64
Atlanta, GA	Terminal	48
Memphis, TN	Terminal	32
Houston, TX	Terminal	30
Birmingham, AL	Drop yard	0

Armada does not operate intermodal service and does not serve the West Coast with its own fleet; West Coast freight is brokered to partner carriers.

SYNTHETIC PROFILE. Not an SEC filing. Illustrative data for the LaneRoom demo.

Item 7. Operating and financial summary

All figures are self-reported by the provider and unaudited (synthetic data for the demo).

Metric	2025	2024
Revenue (in millions)	$412.6	$389.0
Operating income (in millions)	$21.9	$25.3
Operating ratio	94.7%	93.5%
Net cash provided by operating activities (in millions)	$38.2	$35.7
Company tractors	1,150	1,090
Loads hauled (in thousands)	286	271

Revenue increased 6.1% in 2025 on new dedicated fleet awards in the Southeast, while operating income declined because of higher purchased transportation costs during the fourth quarter peak season.

Armada reported an on-time delivery rate of 95.2% and a cargo claims ratio of 0.21% of revenue across all contract lanes in 2025.

Armada's average linehaul rate on dry van truckload contract freight, excluding fuel surcharge, was $2.29 per mile in 2025.
